

# Chickens

Buy the gift of chickens - with information and a photo at:  
[www.sendacowgifts.org.uk](http://www.sendacowgifts.org.uk)

Earn these by raising  
**£20**  
for four

**Chickens** are very easy to look after! They provide poor families with healthy eggs to eat and sell, meat to eat - and droppings for the garden.

**Chick Facts:** There are more chickens than people in the world! Not good for people with Alektorophobia - that's the fear of chickens and feathered creatures!

## Great ideas for your class:

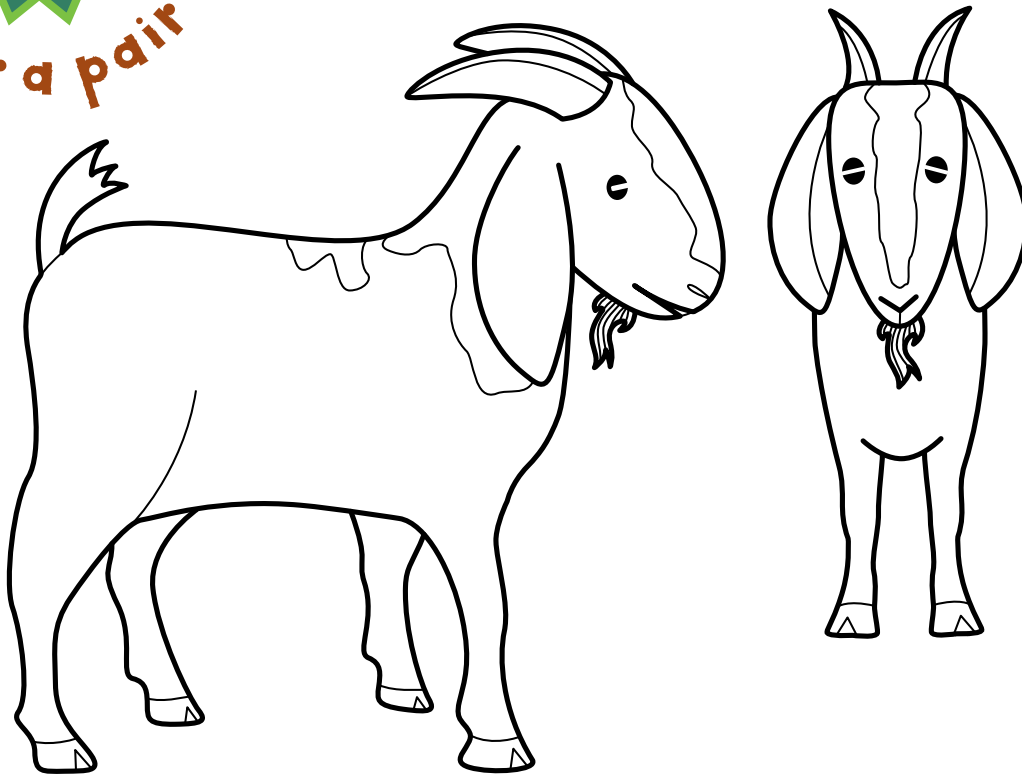

Have an 'Eggs-ellent Day' at your school where boiled eggs are served to your class for lunch (just like in many African countries) - charging a pound for each one. Or collect money from family and friends in egg boxes to raise your £20 for 4 chickens.

# Local Goats

Buy the gift of two local goats - with information and a photo at: [www.sendacowgifts.org.uk](http://www.sendacowgifts.org.uk)

Earn these by raising  
**£58**  
for a pair

**Goats** As well as providing manure and meat, goats breed quickly - producing two kids a year. Goat owners soon have goats to pass on and sell - helping many more families in no time.

**Goat Facts:** The pupil in a goat's eye is not round like other animals, but rectangular! It's believed that goats have great night-vision and will often feed at night.

## Great ideas for your class:

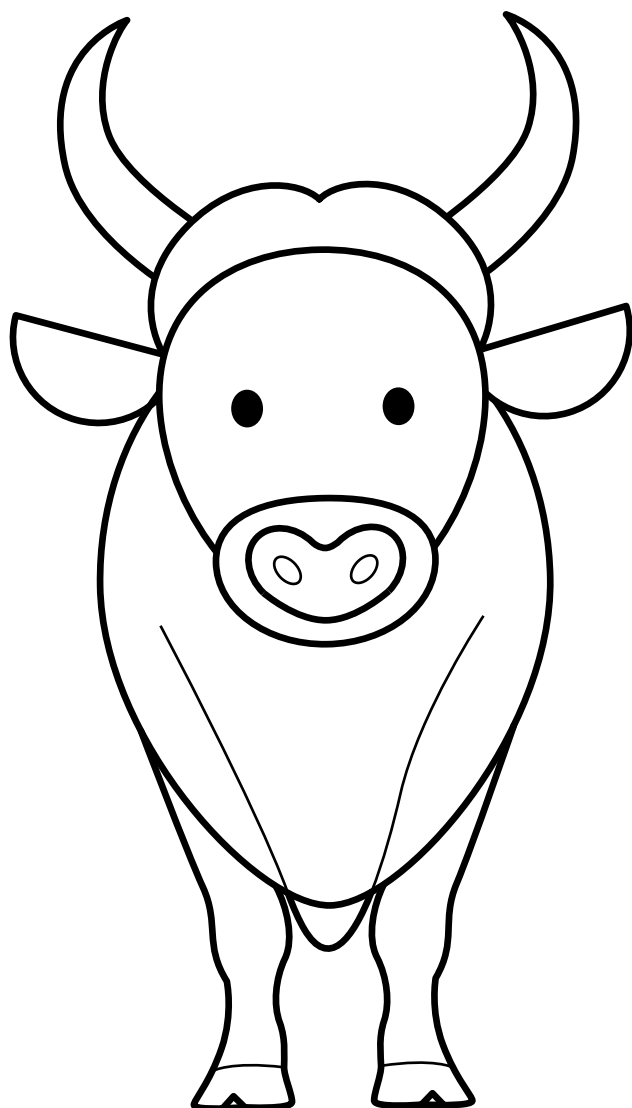

Invite a local goatkeeper to your school with some goats, and pay 50p to Send a Cow to cuddle and stroke them!

Or, make 'Goat Dropping Buns' to sell at school using chocolate and raisins! Yum.

[www.sendacow.org.uk/africanfarmyard](http://www.sendacow.org.uk/africanfarmyard)

Buy the gift of a local cow - with information and a photo at:  
[www.sendacowgifts.org.uk](http://www.sendacowgifts.org.uk)

**Local Cows** Local cows are really useful in dry areas, where we provide a pair to pull ploughs. The fantastic manure they produce improves the soil - and they're also great for breeding!

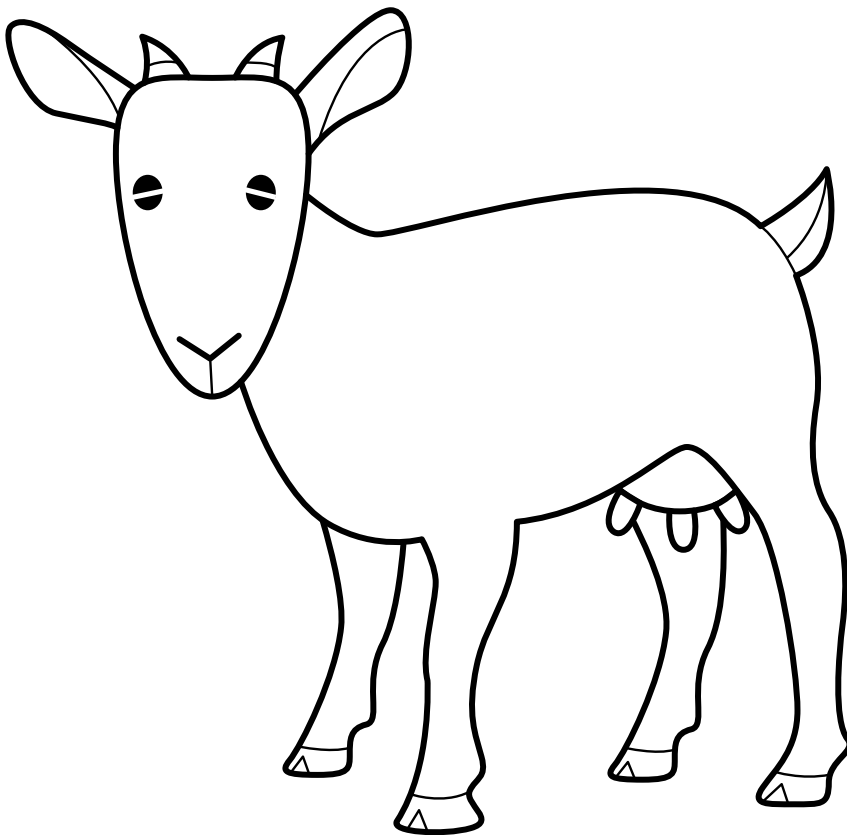

**Cow Facts:** A lot of a cow's day is spent eating, (6 hours) regurgitating food (8 hours) and chewing (41,630 jaw movements or 50 a minute!).

### Great ideas for your class:

To raise money for this item, you could have a 'Crazy Cow Day'! when everyone makes and sells some cow pat biscuits and milkshakes for Send a Cow. Or maybe everyone in the school could bring in a couple of 50p pieces to create a huge Silver Calf in the playground - why not use this one as a template?

# Dairy Goats

Buy the gift of a pair of dairy goats - with information and a photo at: [www.sendacowgifts.org.uk](http://www.sendacowgifts.org.uk)

Earn this by raising  
**€155**  
for a pair

**Goats** Giving nutritious milk to poor families, dairy goats help children to grow up healthily. And the kids fetch a good price at the market too!

**Goat Facts:** Goats' have been kept by humans since the earliest times for milk, meat and skins. At times they were more valuable than silver, and were also used as money before coins were invented.

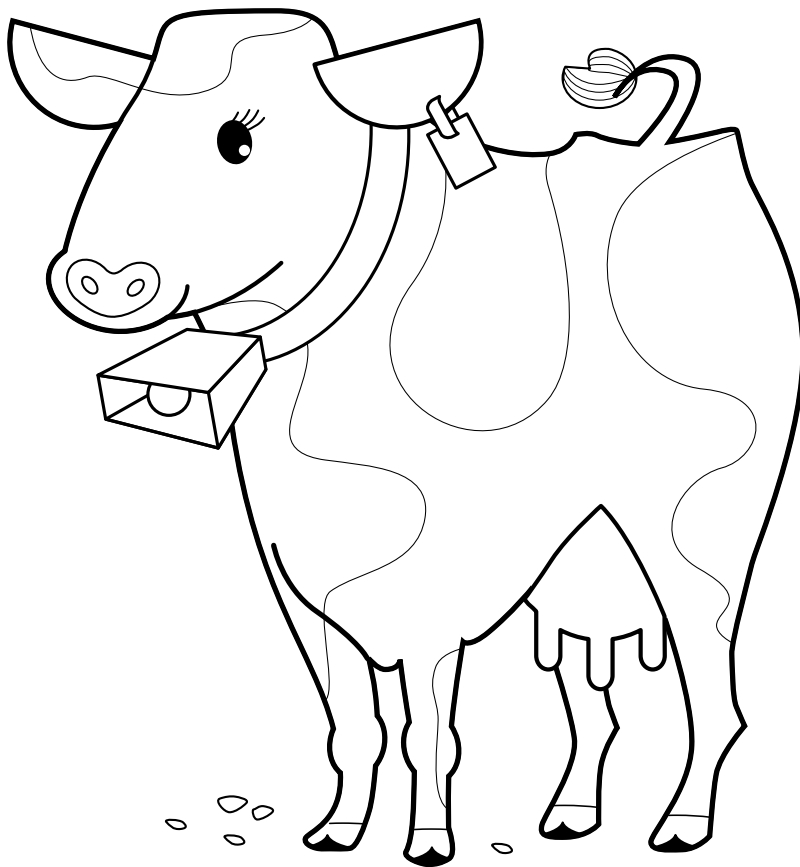

## Great ideas for your class:

Invite a local goatkeeper to your school with some goats, and pay 50p to Send a Cow to cuddle and stroke them!

Or, make 'Goat Dropping Buns' to sell at school using chocolate and raisins! Yum.

# Dairy Cow

Buy the gift of a dairy cow - with information and a photo at:  
[www.sendacowgifts.org.uk](http://www.sendacowgifts.org.uk)

Earn this by raising  
**£750**

**Dairy Cows** Being given one of our cows makes a massive difference to a poor family. They can sell any extra milk they don't drink and use the cow manure to grow vegetables to eat and sell too.

**Cow Fact:** With four different stomach sections, each doing a different job, cows can turn boring grass into nutritious milk in no time! (It also means they poo 15.7 times a day. Beat that!)

## Great ideas for your class:

Two legs good - four legs better! Live one day of your life as a COW... by attaching yourself to a friend and doing everything with four legs. Ask people to sponsor you - say, twenty pence for every hour you do.

Then drive your teachers nuts by whole CLASSES doing it every lunchtime for a week - now that would be un-herd off!

[www.sendacow.org.uk/africanfarmyard](http://www.sendacow.org.uk/africanfarmyard)

# Fodder Trees

Earn these by raising  
**£6**  
...and plant a tree!

## Fodder Trees

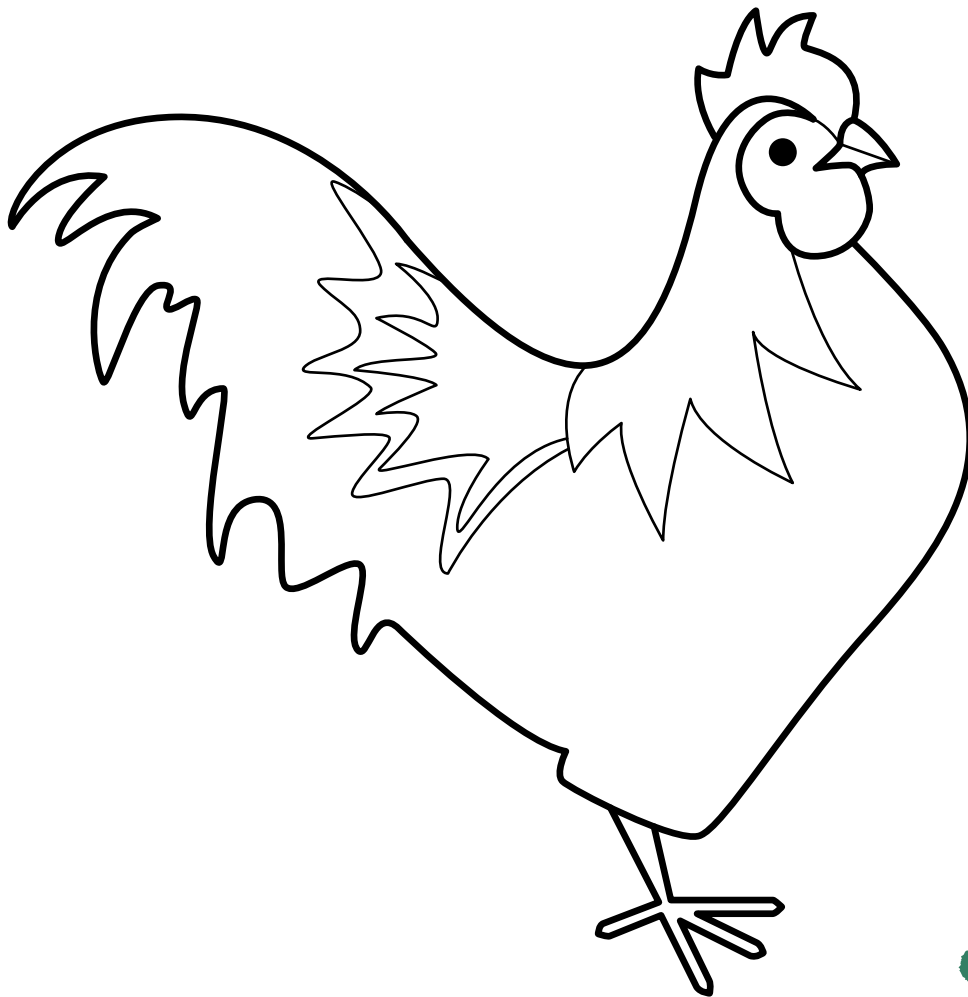

Grass and trees are grown and then mixed with leaves to give farm animals a healthy diet. The trees keep the soil together and add nitrogen into it, plus they give off oxygen – all healthy for the environment!

## Great ideas for your class:

Plant some seedlings with your class with the free seeds and advice at: [www.treeforall.org.uk](http://www.treeforall.org.uk). Then grow some fodder for yourselves - lettuce, rocket and spinach plants!

**Tree Fact:** The African 'Sausage Tree' has grey, sausage shaped fruits that grow up to 60 cms long. The trees are also home to dwarf bats which 'hang out' there - pollinating the bright red flowers!

# Cockerel

Earn this by raising  
**£5**

**Cockerel** A top quality cockerel is really useful to have, as any chickens that are bred with it produce quality chicks that will grow up to lay more eggs than a normal chicken.

**Cockerel Fact:** If a flock of hens loses its cockerel, one of the girls will take on the job - stopping laying eggs, and crowing instead!

## Great ideas for your class:

Raise money to pay for a cockerel or two by having a 'Cockadoodle Do' - a great competition where the loudest crowing entrant wins and gets to decorate the cockerel for your display.  
Entry fee - 50p for Send a Cow!
